

Chroma Gesso

Chroma Gesso for preparation of painting surfaces. It is available in three grades - Basic, Artist and Professional. All three grades are quick drying to a flexible, matte finish, provide superior tooth and maximum adhesion and are non-toxic

Basic Gesso - Student grade white gesso with a fine tooth providing good covering power for moisture and water resistance.

Artists' Gesso - Quality, heavy-bodied bright white gesso with maximum opacity, adhesion and water resistance. Dries to a non-yellowing, flexible matte finish.

Professional Gesso - Premium, heavy bodies bright white gesso with maximum opacity, adhesion and water resistance. Contains high levels of titanium dioxide, calcite grit and acrylic resin. Dries to a non-yellowing, flexible matte finish.

Comes in three grades of white in quart jars and gallon buckets and one grade of black in quart jars.
