Blossom	Titanium White Yellow Oxide + Naphthol Crimson + Indian Red Oxide 12:2:1/2:1/2

The colour mixes provided may vary slightly from the pigments used to manufacture the background colours. Squeeze chocolate chip sized dots onto your palette in specified ratios.

The first colour listed is the largest quantity with the 't' in the recipe meaning a touch of that colour to be added to the mix just a little bit at a time. You may transfer the mixtures to film-type canisters for long term storage.

Don't forget to label your mixes for future references.
