

CHROMA'S JO SONJA®

FACT SHEET

JO SONJA'S GLASS AND TILE PAINTING MEDIUM

Mix this medium with JO SONJA'S ARTISTS' COLOURS to make a glass or ceramic tile paint thereby eliminating the need to buy separate products.

Clean and dry surface thoroughly.

Add 3 parts medium to 1 part JO SONJA'S COLOUR and blend together thoroughly.

Mix small amounts as this medium dries quickly.

A stay wet palette will prolong 'open' time.

Heat curing is necessary to ensure design is durable.

Place decorated articles in a cold domestic oven and set temperature to 165°C or 330°C. (155°C if gas or fan forced.)

When temperature is reached, maintain for at least 45 minutes. DO NOT REMOVE UNTIL COOLED. (NB: A hair drier is not sufficient to heat cure article.)

TO ENSURE DURABILITY OF DESIGN, AVOID use of harsh cleaning agents. IF TILING, DO NOT GROUT OVER DESIGN AREA.

IF YOUR ARTICLE IS TO BE USED FOR FOOD/DRINKS, WE RECOMMEND THAT CADMIUM PAINT NOT BE USED IN CONJUNCTION WITH THIS MEDIUM.

HAND WASHING of items strongly recommended - do not soak items.
