FACT SHEET

JO SONJA'S IRIDESCENT COLOURS

The Iridescent Colours in the JO SONJA range are:

IRIDESCENT RED
IRIDESCENT GREEN
IRIDESCENT VIOLET

IRIDESCENT ORANGE
IRIDESCENT BLUE

The Iridescent Colours in the tube appear white at first glance. The shimmer is noticed once painted out.

TIP: Place your Iridescent Colours next to their compliment colour on your palette, e.g. Iridescent Blue next to your blues and Iridescent Red next to your reds, etc.

Use to highlight in general painting; fairy wings; fish fins; etc.

Use for shimmering effects in spraying and other faux finish techniques.

Use to enhance a desired hue on pearl backgrounds.

Use on duck and fish decoys/lures where iridescent highlights are desired.

Use for iridescent bands or stripes and border detail.

Sponge on ribbon and other trims for sparkling Christmas accents.

Iridescent Colours, when used over a DARK background provide a vivid effect; when used over LIGHT backgrounds a more subtle effect is achieved.

The Iridescent effects will vary depending on application and background colours applied.
