

A2 LIGHTFAST 1 LITRE GUIDE

ARE MY A2 COLOURS LIGHTFAST?

Chroma's A2 Acrylics are now lightfast in the 1 litre size and the 250ml and tubes will soon be lightfast too. All the NEW A2 colours are lightfast, however it can be difficult to know if the A2 you have is the new lightfast formula.

This information sheet will show you how to tell for sure if the A2 you have is lightfast or not.

MOST A2 COLOURS HAVE ALWAYS BEEN LIGHTFAST

The majority of the old A2 colours have always been lightfast and no matter when you bought these colours you can be sure they are lightfast.

Even if the following colours don't carry the lightfast sticker they are definitely lightfast

<input type="checkbox"/> Titanium White	<input checked="" type="checkbox"/> Pthalo Blue	<input checked="" type="checkbox"/> Yellow Oxide	<input checked="" type="checkbox"/> Warm Grey
<input checked="" type="checkbox"/> Ivory Black	<input checked="" type="checkbox"/> Cobalt Blue Hue	<input checked="" type="checkbox"/> Light Red Oxide	<input checked="" type="checkbox"/> Green Light
<input checked="" type="checkbox"/> Cadmium Yellow Light Hue	<input checked="" type="checkbox"/> Cerulean Blue Hue	<input checked="" type="checkbox"/> Burnt Sienna	
<input checked="" type="checkbox"/> Ultramarine Blue	<input checked="" type="checkbox"/> Pthalo Green	<input checked="" type="checkbox"/> Burnt Umber	

A2 COLOURS THAT HAVE BEEN UPGRADED

Some colours of course have changed and are now made with artists' quality lightfast pigments instead of student grade pigments. To help identify the new lightfast colours from the old ones we have labelled them with bright lightfast stickers.

If these colours don't have the lightfast sticker then they are not lightfast

<input checked="" type="checkbox"/> Cadmium Yellow Medium Hue	<input checked="" type="checkbox"/> Cadmium Scarlet Hue	<input checked="" type="checkbox"/> Alizarine Crimson
<input checked="" type="checkbox"/> Cadmium Orange Hue	<input checked="" type="checkbox"/> Cadmium Red Medium Hue	<input checked="" type="checkbox"/> Dioxazine Purple

FULL LIGHTFAST AND PIGMENT INFORMATION LABELLING

All new A2 1 litre bottles purchased from Chroma in the future will carry lightfast and pigment information. We have over labelled all our current stock in the warehouse and any new product will have the lightfastness rating and pigment information printed on the silver panel at the bottom of the label.

In time the A2 logo on the packaging will be updated to include the word lightfast.
