

Chromacryl®

MEDIUMS GUIDE

CLEAR GEL MEDIUM

PAINT EXTENDER

Use for artworks that require you to extend your paint further. It is also a great medium for glazing techniques.

MONOPRINTING

This is a very good medium to use for monoprinting. Try the simple lesson below in your classroom to introduce the children to monoprinting.

Monoprinting Lesson

- Mix **Chromacryl Clear Gel Medium** into your **Chroma** paints (any **Chroma** paint)
- Give the children a plastic plate and ask them to paint on the bottom of it.
- Ask the children to lay a piece of paper over their artwork and pull it off.
- This creates a print of their own artwork. You can also ask the children to draw on the back of the paper when it is on the plastic plate, to create a scratched inlaid print.
- This is a great lesson to introduce children to the art of printing.

TRANSPARENT GLAZING

You can achieve transparent glazing techniques with **Chromacryl Clear Gel Medium**. Simply paint on a layer of **Chromacryl Clear Gel Medium** over the completed artwork for a great finished quality.
